Chiropractic specializes in the diagnosis and treatment of conditions that are caused by mechanical dysfunction of the joints, and their effects on the nervous system. Chiropractors use their hands to adjust joints, the spine and other parts of the body where restricted movement is experienced. These adjustments improve mobility and relieve pain. Chiropractors treat patients for many conditions including:

- Neck pain
- Back pain
- Headaches and migraines
- Hip, Leg, knee and foot problems
- Shoulder, arm, and wrist problems (carpal tunnel)
