Comprehensive orthopaedic and spine care is provided on site, as well as treatment of a wide variety of diseases, injuries and conditions of the musculo-skeletal system. Center treats back and neck pain, feet and hand injuries, joint conditions, and provides sports medicine services.

Joint replacement surgery is performed in Culpeper. Hands, knees, hips and other joints damaged by injury or disease can be reconstructed, replaced and rehabilitated. Arthroscopic surgery can be preformed in the hospital as an outpatient. Arthritic treatment is also offered.

Back and Neck Pain - Physicians treat persistent back pain and perform back surgery. Injection therapy can sometimes dissolve disc problems and physical therapy helps rehabilitate, educate and prevent injury.

Rehabilitation provided for patients on site. Occupational therapy and physical therapy available for lacerations, fractures and injuries to hands and upper extremities. Physical therapy patients work with exercise machines, modalities and state-of-the-art equipment such as Cybex, UBE and a Fitron.

All records are confidential.
